M7 16% Supercharger Pulley

Thank you for purchasing the M7 16% Supercharger Pulley. We're sure that you're going to enjoy the increased performance from this product!

Please note that professional installation is recommended for this unit.

The M7 16% Supercharger Pulley is a two-part product. Remove the black cap from the supercharger pulley shaft and the black collar from the base of the pulley shaft. Slide the M7 Pulley collar onto the pulley shaft. The main piece of the pulley sits on the shaft afterwards. Pull the collar up to the main part of the pulley and insert the four screws with a drop of blue Loctite on the threads. Tighten the 4 screws down evenly so that the collar sits correctly.

DO NOT OVER-TORQUE THE SCREWS! Hand tight is actually sufficient (less than 20 ft-lbs).

If you have any questions or concerns, don't hesitate to call our office Monday – Friday, 9am—6pm PST. Or e-mail us techsupport@m7tuning.com.

Enjoy the Ride,

Team M7
