M7 TUNING **R56 Intercooler Bezel**

Thank you for your purchase!

PLEASE READ INSTALLATION MANUAL BEFORE INSTALLING PRODUCT.

To ensure proper installation and maximum performance follow these steps:

Remove the front plastic bumper cover.

Spray WD-40 on the bezel surround—all inside surfaces that will make contact with the intercooler. This will help ensure that the bezel will slide onto the intercooler easily.

Make sure that the bezel is seated properly—all the way in.

For Standard Version:

Re-install the bumper cover. Installation is complete.

For Race Version ONLY:

You will need to cut a centered 21" x 4" horizontal opening in the black, bottom part of the bumper—parallel with the ground to allow the scoop part of the bezel to fit through the bumper. Re-install the bumper cover. Installation is complete.

For further technical support, please e-mail techsupport@m7tuning.com or call our office at +1-562-608-8123 Monday – Friday, 9:00am – 6:pm PST.

Thank you again for your purchase – we appreciate your business.

Enjoy the ride!

Team M7
