

HOW TO Clean Your MAXX-FLO Filter

Follow the three simple steps below to learn how to use our cleaning kit and breathe new life into your high performance air filter.

STEP 1

Remove and Clean

- Clean the sealing area and filter housing with a clean soft rag.
- Tap the filter on a hard surface to remove any debris.
- Use S&B's Filter Cleaner to clean the filter.
- Gently rinse out the cleaner using low pressure water.
- Let filter dry for at least 24 hours.

STEP 2

Fill and Apply

- Fill applicator with exact amount of oil required for your filter.
- Starting 1/2 way from base make 2-3 passes around the circumference of the filter in the same area.
- Repeat this process evenly spacing out the passes.

STEP 3

Inspect and Install

- Allow oil to bleed for 20-30 minutes.
- Inspect the filter for any white areas.
- With the remaining oil in the applicator apply a small amount of oil to those white areas.
- DO NOT over oil your filter.
